Endcap Muon Meeting
CERN
25 February 2003

Information Pool Structure

ISR

Information Pool consists of (unlimited) space in CERN central Oracle database and CMS Web server space (few Gbyte). Central Database is filled by direct applications (AFEB, ALCT, Cables etc.) and by local FAST sites databases (chambers and boards tracking). Test results from FAST sites (as a set of files for each chamber) are saved on local Web spaces (where ISR uses central Web space as a local one). In a time (if necessary) the important results from tests will be decoded from files and uploaded into Central Database for subsequent use in the experiment. Web space is also used for presentation of activities at CERN and simple accounting of equipment at ISR ("Inventory on Web").

Central Database

R. Breedon
I. Vorobiev
V. Sytnik

ISR Local Database

V. Andreev
C. Matthey

Central Database

I. Vorobiev

Maintenance of Central DB, applications, Web site.

V. Sytnik

Maintenance of central applications for tracking, local DB software.

R. Breedon

Work on new applications.

ISR Local Database

V. Andreev

C. Matthey

Organization of data flow at ISR (into local DB, test files on Web + inventory).

URL address:

<http://cmsdoc.cern.ch/CSC/CERN/Welcome.html>

Gives access to all information: database, test results, inventory, pictures, CERN group minutes and so on.

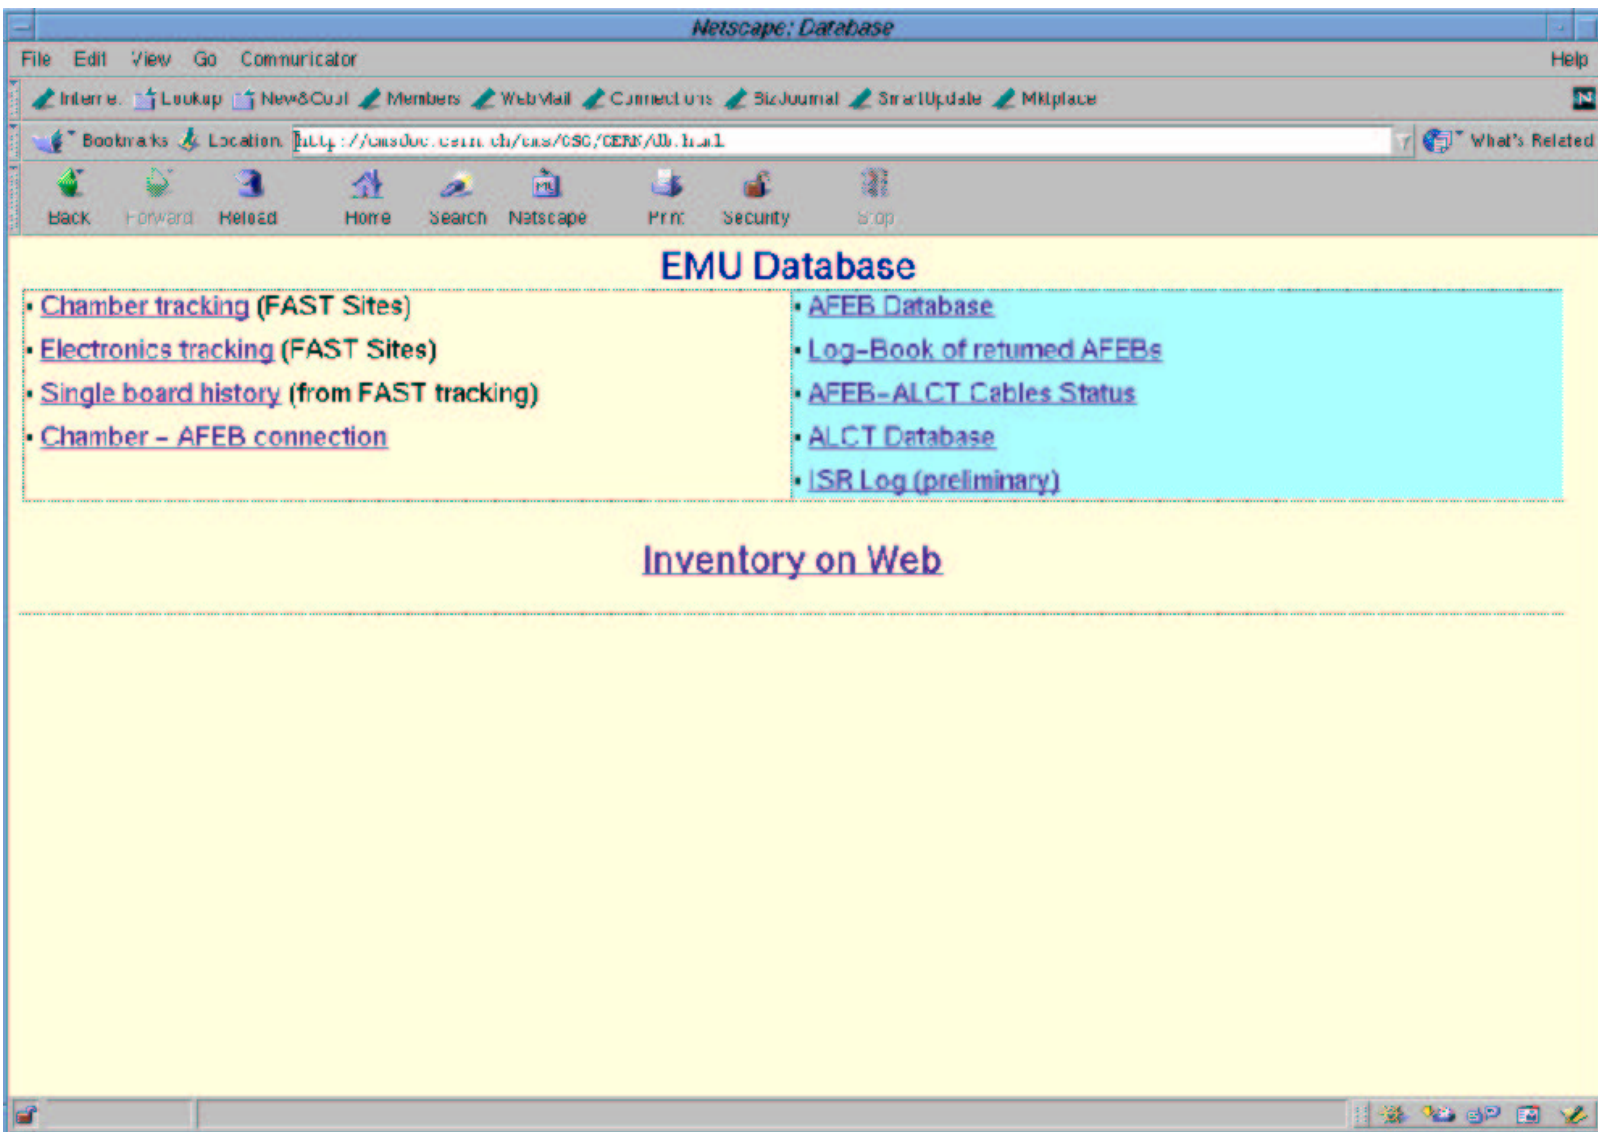

Database Web Page

URL address:

<http://cmsdoc.cern.ch/cms/CSC/CERN/db.html>

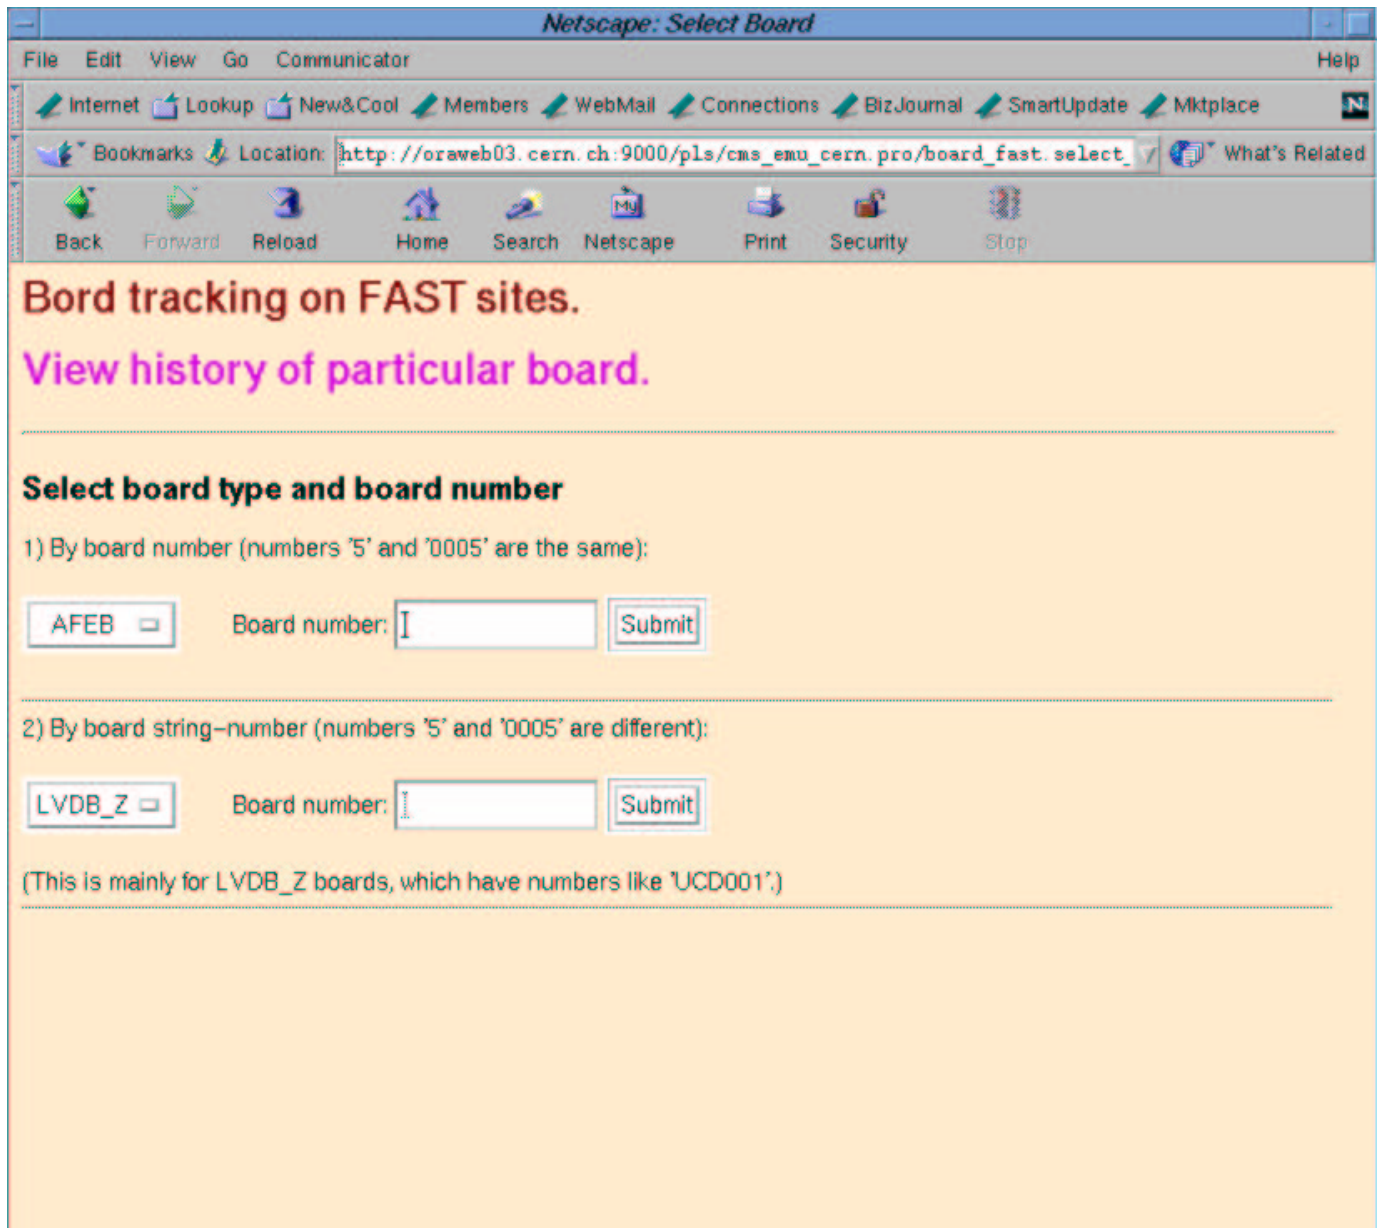

Left column - FAST sites DB, right - direct applications.
"Chamber - AFEB connection" - cross reference.

DB: Single board history (from board tracking)

URL address:

http://oraweb03.cern.ch:9000/pls/cms_emu_cern.pro/
/board_fast.select_board

Click on “Single board history” from DB page.
